The final countdown?

4th Investigator meeting April 25th 17.00 (CET)

Dear all investigators

2024 has seen a record breaking accrual in the trial and we are quickly approaching the preplanned sample size of 768 women! We invite all principal investigators and study team members to the 4th investigator meeting to address the following questions:

- Results from the second interim analysis
- When do we close the trial?
- What happens after the trial?
- When can we expect data from the RACC-trial?

Welcome to this very important virtual investigator meeting (meeting link will follow) on April 25th 17.00 (CET)!

Data entry - Focus on follow-up

As we are approaching the end of the trial, it is of utmost importance that all principle investigators make sure that all available data are entered into the eCRF. We notice that a substantial number of follow-up visits are missing from the database which may affect assessment of event-rate in the trial. We therefore ask all PIs to ensure data integrity before the investigator meeting **April 25th**.

Visit	Expected		NO entry in eCRF		eCRF	
	n		n	%	n	%
Preop	745		39	5,23	706	94,77
Surgery	745		72	9,66	673	90,34
FU 1 month	707		66	9,34	641	90,66
FU 6 months	626		76	12,14	550	87,86
FU 1 year	510		84	16,47	426	83,53
FU 2 years	293		71	24,23	222	75,77
FU 3 years	132		23	17,42	109	82,58
FU 5 years	0		0	0,00	0	
End of study	31		0	0,00	31	100,00

Table 1. Expected vs actually entered data in the eCRF from follow-up visits in the RACC-trial
