Newsletter March 2023

Dear investigators

The RACC-trial has now been running successfully for almost 4 years thanks to the amazing contribution from all 26 active sites! We passed 500 enrolled patients in February and should reach 600 within 3-4 months.

Some important things

- Teams meeting for data managers (or anyone involved in data entry):

April 5th 14.30-16.00 (CET)

Our project manager and data manager will go through any issues you might be facing with the eCRF

A Teams link will follow

- Please make sure to enter all available QoL data that you may have in paper format. QoL completeness must improve to ensure reliable results.
- Please make sure that all patients fill out QoL questionnaires before randomization.

No QoL questionnaires=no randomization!

- Please make sure to include all eligible patients in the screening log. *This will allow us to report potential selection bias.*
