## Less than 100 to go!

### Dear all investigators

Last week, the 669th patient was enrolled in the RACC-trial which means that we have less than 100 left before we reach the pre-planned 768 patients! The accrual has been terrific during September and October and we should definitely reach **700 before the end of 2023!**

---

### Next interim analysis coming up

Once we reach 700 enrolled patients, the Data Safety and Monitoring Board (DSMB) will conduct an interim analysis. The purpose is to analyze the rate of events (recurrence/death) and provide the Trial Steering Committee with advice on how to proceed with the trial. We therefore ask all investigators to complete the eCRFs for all enrolled patients with particular emphasis on recurrences or deaths.

**Please review all your enrolled patients and make sure that all available data are entered into the eCRF before December 15th!**

---

### QoL completeness

We observe a questionnaire completeness around 70-80% depending on instrument and follow-up visit. We want to stress the importance of collecting the questionnaires at all time points to ensure reliable data. This is of utmost importance for the success of the RACC-trial!
